Mr. Bo Chulindra

Salesforce, Inc.

223 S West St,

Raleigh, NC 27606

Dear Mr. Chulindra:

Your advertisement for a full-stack software engineer on LinkedIn caught my attention, because of the affinity of its job requirements and my skills. With my schooling and experiences, and my hard-working nature, I am excited to apply for this position and contribute to Salesforce.

Through rigorous courses in software engineering, I have gained a deep knowledge of object-oriented programming. Working on several personal projects has increased my knowledge on web technologies, frameworks, and various testing methods. I possess experience working with groups, assigning tasks to individuals to optimally work on projects. My success in school has matured me into a developer who can be a top performer in my field.

Your company boasts its desire to improve customer relations, which is a trait I identify with. Working in previous retail jobs, I understand the importance in costumer relations, as well as how they can be maintained. Through my experiences, I have gained the communication skills necessary to become a good developer.

My GitHub account mentioned on my résumé contains my projects from coursework and self-side projects. The projects showcase my versatility to work as a full-stack software engineer. I have worked in several object-oriented programming languages, including Java, JavaScript, and Python. My TierListMaker project displays my knowledge of web technologies, such as JavaScript, HTML5, and CSS. Another project, InstaScript, utilizes Selenium functional testing in Python to automate Instagram tasks. Overall, I am a determined worker who is excited to use my creativity to build software. If you have any questions, you can contact me at (919) 592-6068 so we can discuss how I can contribute to Salesforce.

Sincerely,

Benson Liu.
